## USB-Stick CS

### USB-Stick in silver

Saving, copying and transporting data made easy: The USB-Stick CS is simply connected to a USB port on your computer and works as an additional drive. You do not need a cable or adapter, no additional power connector and driver software.

Due to the extremely fast USB 2.0 connector, larger amounts of data are transferred instantly to the portable memory. Of course, the USB 1.1 port is still supported.
